US-08-985-162-304

| Sequence 304, Application US/08985162
| Patent No. 6057156
| Patent No. 6057156
| GENERAL INFORMATION:
| APPLICANT: Akhtar: Saghir
| APPLICANT: McSwiggen, James
| TITLE OF INVENTION: ENZYMATIC NUCLEIC ACID TREATMENT ITLE OF INVENTION: OF DISEASES OR CONDITIONS RELATED ITLIE OF INVENTION: OF DISEASES OR CONDITIONS RELATED ITLIE OF INVENTION: PACTOR RECEPTORS
| NUMBER OF SEQUENCES: 1877
| CORRESPONDENCE ADDRESS: 1877
| ADDRESSEE: Lyon & Lyon
| ADDRESSEE: Lyon & Lyon
APPLICANT: McSwiggen, James
TITLE OF INVENTION: ENGYMATIC NUCLEIC ACID TREATMENT
TITLE OF INVENTION: OF DISEASES OR CONDITIONS RELATED
TITLE OF INVENTION: TO LEVELS OF PEIDERMAL GROWTH
TITLE OF INVENTION: FACTOR RECEPTORS
NUMBER OF SEQUENCES: 1877
CORRESPONDENCE ADDRESS:
ADDRESSED: Lyon & Lyon
                                                                                                                                                                                         CORRESPONDENCE ALCORDON.

Sequence 5995, Application US/08584040

Patent No. 6346398

GENERAL INFORMATION:
APPLICANT: Bavco, Pamela
APPLICANT: Stinchcomb, Dan T.
APPLICANT: Scobedo, Jaime
TITLE OF INVENTION: METHOD AND REAGENT FOR THE
TITLE OF INVENTION: TRATMENT OF DISEASES OR
TITLE OF INVENTION: CONDITIONS RELATED TO LEVELS
TITLE OF INVENTION: GROWTH FACTOR
NUMBER OF SEQUENCES: 8502
CORRESPONDENCE ADDRESS:
ADDRESSEE: Lyon & Lyon
STREET: Suite 4700
CITY: Los Angel...
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   COMPUTER READABLE FORM:
MEDIUM TYPE: 3.5" Diskette, 1.44 Mb
MEDIUM TYPE: storage

Sequence 13, Application US/09586376
GENERAL INFORMATION
APPLICANT: Guida, Marco
APPLICANT: Hall, Jeff
TITLE OF INVENTION: GENETIC TYPING OF THE HUMAN CYTOCHROME P450 2A6 GENE
TITLE OF INVENTION: AND RELATED MATERIALS AND METHODS
FILE REFERENCE: 4389-20
CURRENT APPLICATION NUMBER: US/09/586,376
CURRENT PILING DATE: 2000-06-02
NUMBER OF SEQ ID NOS: 29
SOFTWARE: PATENTIN Ver. 2.1

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Sequence 1533, Application US/09371772B
; Sequence 1533, Application US/09371772B
; Patent No. 6566127
; GENERAL INFORMATION:
; APPLICANT: Ribozyme Pharmaceuticals, Inc.
; APPLICANT: Revolve Pam
; APPLICANT: Beschedo, Jaim
; APPLICANT: Stinchcomb, Dan
; TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Re
; TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Re
; TITLE OF INVENTION: Method on 4 Vascular Endothelial Growth Factor Receptor
; TITLE OF INVENTION NUMBER: US 60/005,974
; FILE REPERENCE: 1999-08-10
; PRIOR FILING DATE: 1999-08-10
; PRIOR FILING DATE: 1996-01-08
; NUMBER OF SEQ ID NOS: 14225
; SSOFTANZE: PatentIn version 3.0
; SEQ ID NO 1533

US-09-371-772B-2244

Sequence 2244, Application US/09371772B

Patent No. 6566127

GENERAL INFORMATION:
APPLICANT: Parco, Pam
APPLICANT: Ribozyme Pharmaceuticals, Inc.
APPLICANT: Richozyme Pharmaceuticals, Inc.
APPLICANT: Richozyme Pharmaceuticals, Inc.
APPLICANT: Escobedo, Jaime
TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Re
TITLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor
FILE REPERENCE: MBHB00, 976-J (237/198)
CURRENT APPLICATION NUMBER: US/09/371,772B

PRIOR FILING DATE: 1999-08-10

PRIOR FILING DATE: 1995-10-26

PRIOR FILING DATE: 1995-10-26
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        GENERAL INFORMATION:

Sequence 3900, Application US/09371772B

Sequence 3900, Application US/09371772B

Patent No. 6566127

GENERAL INFORMATION:

APPLICANT: Bavco, Pam and Reagent for the Treatment of Diseases or Conditions Relliance INVENTION: McSavigsen, Jam APPLICANT: Escobedo, Jaim APPLICANT: Browning Members of Vascular Endothelial Growth Factor Receptor TILLE OF INVENTION: Levels of Vascular Endothelial Growth Factor Receptor TILLE REFERENCE: MBHB00,876-J (237/198)

FILE REFERENCE: MBHB00,876-J (237/198)

CURRENT APPLICATION NUMBER: US 60/005,974

PRIOR APPLICATION NUMBER: US 60/005,974

PRIOR APPLICATION NUMBER: US 08/584,040

PRIOR FILING DATE: 1995-01-08

NUMBER OF SEQ ID NOS: 14225

SEQ ID NO 3900

SEQ ID NO 3900

LENGTH: 17

Sequence 4764, Application US/09371772B

Patent No. 6566127

GENERAL INFORMATION:

APPLICANT: Ribozyme Pharmaceuticals, Inc.

APPLICANT: Pavco. Pam

APPLICANT: Bacobedo, Jaime

APPLICANT: Brinchcomb, Dan

APPLICANT: Brinchcomb, Dan

TILE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Re

TILE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Re

TILE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Re

TILE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Re

TILE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Re

TILE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Re

TILE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Re

TILE OF INVENTION WIMBER: US/09/371,772B

CURRENT FILING DATE: 1999-08-10

PRIOR FILING DATE: 1995-10-26

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Sequence 4822, Application US/09371772B

Sequence 4822, Application US/09371772B

Partent No. 6566127

GENERAL INFORMATION:

APPLICANT: Ribozyme Pharmaceuticals, Inc.

APPLICANT: Pavco, Pam

APPLICANT: Bavco, Dam

APPLICANT: Escobedo, Jaime

TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Re

TITLE OF INVENTION: Method and Reagent Endothelial Growth Factor Receptor

TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Re

TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Re

TITLE OF INVENTION: Method and Reagent for the Treatment of Diseases or Conditions Re

Sequence 14, Application US/09415099

Patent No. 6653088

GENERAL INFORMATION:
APPLICANT: CZECH, Christian
APPLICANT: PRADIER, Laurent
TITLE OF INVENTION: PEPTIDES CAPABLE OF INHIBITING THE INTERACTION BETWEEN
TITLE OF INVENTION: PEPTIDES CAPABLE OF INHIBITING THE BITA-AMYLOID
TITLE OF INVENTION: PEPTIDE AND THE BETA-AMYLOID PEPTIDE AND THE
TITLE OF INVENTION: INTERACTION TEST FOR THE INVESTIGATION OF INHIB
TITLE OF INVENTION: INTERACTION TEST FOR THE INVESTIGATION OF INHIB
TITLE OF INVENTION UNMERR: DCS/09/415,099
CURRENT FILING DATE: 1999-10-23

BARLIER FILING DATE: 1999-10-23

BARLIER FILING DATE: 1998-10-08
